Research & Data Analytics

## EDUCATION

**Yonsei University / Economics Undergraduate / Enrolled 2024**

Expected Feb 2029

Financial Academy

Apr 2026

- Earned highest honors and an exclusive letter of recommendation; ranked among the top 3 of 150+ participants (top 2%) based on peer reviews and final project evaluation.

## PROJECT EXPERIENCE

**FinDone / Finance Learning App and Quiz Option Ranking Model**

Jul-Aug 2026

Independent Project / App and Model Development / Content Validation

- Built a personal Android app and content management website linking explanations, formulas and sources for 135 finance concepts with quizzes and review records; implemented concept search with SQLite FTS5/BM25.
- Trained an 18-feature XGBoost ranking model in Python to select plausible incorrect quiz choices from other concept descriptions; compared 198 keyword and pretrained embedding retrieval configurations.
- Separated 95/20/20 concepts for training/validation/testing; selected configurations using validation data, evaluated on test data, and documented automatically generated relevance labels, experimental settings and comparative results.
- Assembled a 405-question bank and ranked candidates during content production; combined automated checks with manual review for answer leakage, duplicate choices and concept mismatches, and required renewed approval after content changes.

**Mirae Asset Securities AI Festival / Disclosure Q&A Agent**

Aug 2026

Document Preprocessing and Embedding Generation

- Preprocessed documents and generated embeddings for a disclosure Q&A agent project supplied with 4,204 filings from 70 companies.
- Documented processing and validation rules by filing type, industry, amendment history and reference date to address double counting of original/amended filings and inconsistent units or reporting periods.

**Happy LLM / AI Conversation Archive**

Sep 2025-Jun 2026

Project Manager and Backend Developer / Four-Person Team

- Developed an LLM API-powered conversation archive; defined workflows for folders, search, bookmarks and links to original conversations, and implemented storage, retrieval and access controls using FastAPI/Supabase.
- Reorganized roles, schedules and release scope after a teammate's departure; combined basic interface development with team recruitment to continue development and complete service deployment.

**ETF Asset Allocation / Risk and Return Analysis**

Jun 2026

Independent Project / Financial Data Analysis

- Analyzed 2015-2024 U.S. equity/Nasdaq-100/long-term Treasury ETF prices in Python; compared 3 fixed strategies and 10,000 random allocations on returns, volatility, maximum drawdown and Sharpe ratios.
- Identified greater maximum drawdown in the lowest-volatility sampled allocation than in a 60/40 stock/Treasury mix; summarized findings and limitations, including in-sample evaluation and the exclusion of trading costs, in a poster and presentation.

## LEADERSHIP & ACTIVITIES

**YCC / Yonsei University Computer Club**

President, Aug 2026-Present / Vice President, Jan-Jul 2026

- Interviewed former and peer-university club leaders to investigate shortages of study-group organizers; developed proposals addressing organizer costs, incentives and new-member participation.
- Introduced server/service funding and next-semester organizer fee waivers after addressing budget concerns; study groups grew from 17 to 28 and projects from 4 to 11 during joint leadership.

## SKILLS

Data & Development: Python / SQL / XGBoost / SQLite / FastAPI / Supabase

Productivity: Excel / PowerPoint | Language: English
